Unite D400 3 flange gully grate 450mm x 450mm clear opening with 150mm frame depth

RANGE	CLEAR OPENING (MM)	BASE OPENING (MM)	OVERALL FRAME (MM)	FRAME DEPTH (MM)	WATERWAY AREA (CM²)	OPTIONS
Unite	450 x 450	475 x 475	670 x 580	150	1,440	Screw locking

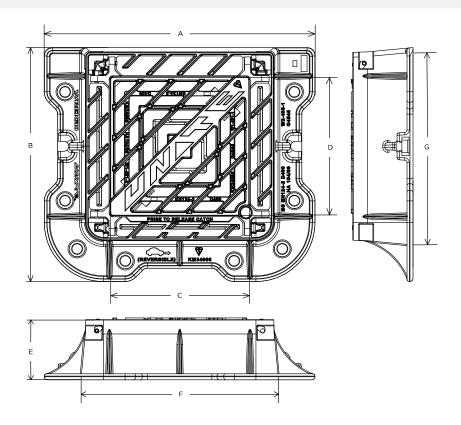

FEATURES

- Both covers of the double triangular grating feature I beams that interlock to provide high rigidity while still allowing the grating to hinge as one unit.
- The enlarged frame corners help to dissipate loads onto the foundation, providing a longer service life and increased reliability.
- Mechanical lifting points are provided.
- Safety-stop hinges prevent covers from falling once opened.
- Unite is available with a 10 year warranty (subject to terms).
- ✓ Meets the requirements of CD 534 v0.1.0 (formerly HA 104/09).
- Indexed corners ensure correct orientation first time, every time.
- Holes in the frame flange where mortar can pass between the underside and top side, creating an interlock, providing greater strength.
- The covers feature a universal beam (also known as an I beam) providing significant improvements to rigidity, reducing seat wear for an enhanced service life.

- Captive hinges reduce theft risk whilst allowing easy lifting.
- Hinged in three directions to allow the product to fit in any required orientation.
- Reversible hinge allows the grating to hinge with the direction of the traffic flow, improving safety.
- Reduced apertures provides increased safety for pedestrians and bicycles, over standard gratings.
- Non rocking 3-point suspension design, for silent operation.
- ✓ Frame gussets are supports which reinforce the corners where the frame sections meet, distributing stress evenly, preventing damage to the frame or the access cover.
- Keyway lifting points are provided on the frame for safe handling.
- Unlike sharp, square-edged frames, rounded edges reduce stress concentrations and minimise crack formation.

NOTES

The D400 load capability of these Group 3 products also offers the benefit of making them suitable for exposure to Group 4 traffic types. Where 3-flange D400 Gully Grate assemblies are employed, we recommend that they are installed against a kerb, not in an open highway location. All values stated are nominal within 2.5% tolerance.

Fully compliant with the requirements of specification clause <u>6.2.47 of Cycle Infrastructure Design</u> <u>Local Transport Note 1/20</u>.
