#### **FEATURES**

- Non rocking 3-point suspension design, for silent operation.
- Captive hinges reduce theft risk whilst allowing easy lifting.
- Frame gussets are supports which reinforce the corners where the frame sections meet, distributing stress evenly, preventing damage to the frame or the access cover.
- Holes in the frame flange where mortar can pass between the underside and top side, creating an interlock, providing greater strength.
- Surface texturing above and below the flange enables better mortar engagement, reducing any lateral movement which could result in cracking.

- ✓ Meets the requirements of CD 534 v0.1.0 (formerly HA 104/09).
- The enlarged frame corners help to dissipate loads onto the foundation, providing a longer service life and increased reliability.
- Keyway lifting points are provided on the frame for safe handling.
- Reversible hinge allows the grating to hinge with the direction of the traffic flow, improving safety.
- Reduced apertures provides increased safety for pedestrians and bicycles, over standard gratings.

### **NOTES**

The D400 load capability of these Group 3 products also offers the benefit of making them suitable for exposure to Group 4 traffic types. Where 3-flange D400 Gully Grate assemblies are employed, we recommend that they are installed against a kerb, not in an open highway location All values stated are nominal within 2.5% tolerance.

Fully compliant with the requirements of specification clause <u>6.2.47 of Cycle Infrastructure Design Local Transport Note 1/20</u>.
