## SOLID TOP EXTERNAL HINGE

Chequer plate solid top (40mm or 75mm deep frame) - Hinged / Lock-lift / Stay bar / Spring assisted

External hinged, spring assisted covers are available to suit a wide range of clear opening sizes and load classes. They are constructed from heavy gauge mild steel and hot dip galvanised for corrosion protection. Supplied as standard with externally hinged lids, locking devices and safety retaining stay bars. An economic solution where ease of access is essential, offering one man operation whilst remaining within lifting guidelines. A versatile cover with many options and variations available to suit most access situations.

- ✓ Spring assisted lift (stainless steel)
- ✓ Lock-lift devices
- ✓ Auto engage / manual release stay bar
